Forward-Looking Statements

This document contains forward-looking statements and factual information that are current as of the date the document was originally created. American Creek Resources Ltd. (“the Company”) disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Forward-looking statements include, but are not limited to, statements with respect to the timing and amount of estimated future exploration, success of exploration activities, expenditures, permitting, and requirements for additional capital and access to data.

Forward looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; the ability to enter into joint ventures or to acquire or dispose of properties; future prices of mineral resources; accidents, labor disputes and other risks of the mining industry; ability to obtain financing; and delays in obtaining governmental approvals of financing.

Any statements, opinions, projections, forecasts or other material contained in this presentation do not constitute a commitment, representation or warranty by the company or its directors, officers, agents or employees. The directors, officers, agents and employees of the company shall in no way be liable to any person or body for any loss, claim, demand, damages, costs or expenses of whatsoever nature arising in any way out of, or in connection with, the information contained in this presentation. This presentation does not constitute an offer to sell securities and is not a solicitation of an offer to buy securities. It is not to be distributed to third parties without the consent of the company. An investment in the company is considered to be speculative in nature. Each individual should rely solely upon its own investigations and inquiries with respect to the company and agrees it will not in any way rely upon this presentation. The company recommends that you consult your own professional advisor(s).

British Columbia's Golden Triangle

The Golden Triangle hosts one of the richest gold / silver / copper belts in the world including the world's largest undeveloped gold deposit (by reserves)

American Creek has three projects in the richest part of the Golden Triangle

"One of the most important mineral trends of northwestern British Columbia extends from near the town of Stewart north to the Treaty Glacier" - Nelson / Kyba, British Columbia Geological Survey, Ministry of Energy and Mines 2014

Mine proliferation

Numerous past producing mines, two mines have just gone into production, many world scale projects moving towards production

New infrastructure

Paved roads, power, ice-free bulk-tonnage port

New geological understanding

of the area positive for new discoveries and directly relates to Treaty Creek – Kyba / Nelson 2014

Geological expertise

Ken Konkin, who discovered and developed Pretivm's Brucejack mine next door (2017), is now the head geologist at our Treaty Creek property

Treaty Creek

gold 79 Au 196.97	silver 47 Ag 107.87	copper 29 Cu 63.546
-----------------------------------	-------------------------------------	-------------------------------------

Treaty Creek is adjacent to, and part of the same hydrothermal system as, the world's largest undeveloped gold deposit by reserves (KSM - Seabridge Gold) and one of the highest-grade precious metal mines in the world (Brucejack – Pretivm); collectively representing one of the greatest concentrations of metal value on the planet.

Treaty Creek has similar geophysical, geological, and structural signatures as the KSM with indications of similar scale with far better logistics. Mineralization starts close to surface and extends beyond 1,300m. Ken Konkin, who discovered and developed the Brucejack mine next door, is now the head geologist at Treaty Creek.

A very ambitious and fully funded 40,000m drill program is in progress. This massive undertaking is planned to dramatically expand the conceptual target, work towards a world-scale resource calculation along with baseline studies and metallurgical work for an initial economic assessment.

 **RED MOUNTAIN**

DUNWELL

 Porter Idaho

 **STEWART, B.C.**

 **PREMIER**

Dunwell Mine

gold 79 Au 196.97	silver 47 Ag 107.87
lead 82 Pb 207.2	zinc 30 Zn 65.39

Historical Production at the Dunwell mine totaled 45,657 tonnes averaging 6.6 g/t gold, 223.9 g/t silver, 1.8% lead, and 2.43% zinc, or 14.3 g/t gold equivalent. A successful maiden drill program in 2019 shows a continuation of high-grade polymetallic veins along strike to the present workings and correlating geophysics shows similar potential in numerous other areas.

Multiple high-grade exposures run for over 5km along strike in the same fissure zone / fault as the mine. Low altitude mine with a highway and power, and only 8km by road from Stewart / port. Potential feedstock for other mines.

A successful geophysics program in 2020 shows numerous high-potential targets extending along the fissure zone / fault system to be drilled in 2021.

NEAR TERM OBJECTIVES HOLD GREAT PROMISE OF DISCOVERY

Treaty Creek – AMK has a carried interest

- 40,000m diamond drill program in 2020 for infill and expansion of the Goldstorm zone
- Define a world class M&I resource calculation on Goldstorm zone – point of discovery creates biggest returns
- Baseline studies and metallurgical work for an initial economic assessment.

Dunwell

- Expand the property to encapsulate the Portland Canal Fissure Zone
- Run a high-resolution 3D magnetic survey on the entire property
- Run a LIDAR survey over the entire property

Gold Hill

- Phase II drilling to expand high-grade mineralization found in initial drilling
- Mapping and sampling existing adits and newly discovered gold veins
- Analyze proposed geophysical programs

Programs on Austruck Bonanza, Ample Goldmax, Silverside, and Glitter King

- Mapping, sampling, magnetic & IP geophysics, and geochemistry

Sean Pownall
Director

Mr. Pownall serves as a Director of the Corporation. He has been involved in the mineral exploration industry for nearly 32 years, starting at an early age working with family on mining projects in the Yukon and in British Columbia. Mr. Pownall has worked as a diamond driller on numerous mineral projects in Canada and the United States ranging from grassroots exploration to full production mining. He is currently the owner of More Core Diamond Drilling Ltd., a company based in Stewart, British Columbia. The company was founded in 2006, and provides diamond core drilling and geotechnical drilling services to mineral and liquid natural gas companies throughout Canada and the United States. Mr. Pownall also served as a Director of the Association for Mineral Exploration British Columbia (AME BC).

Dennis Edwards, CPA, CA
Director

Mr. Edwards serves as a Director of the Corporation. Mr. Edwards attended Lethbridge Community College and the University of Lethbridge where he earned his BA in Agricultural Economics. He attended the Chartered Accountant School of Business where he earned his Chartered Accountant designation and has been employed in the accounting field for over 12 years. He is currently a partner in a private accounting firm. Mr. Edwards is a member of the Chartered Professional Accountants of Alberta.

Summary

Strong Management

- Management, directors, and advisors with extensive exploration experience

Exceptional Properties

- In the richest part of B.C.'s Golden Triangle and other historic mining camps
- Next to world class deposits & mines with same geology
- In a politically stable region
- Excellent logistics combined with tremendous potential
- Discovery stage – resource calculation in the near future

Joint Ventures with strong partner with mining success

- Walter Storm has the “Midas Touch” in business including the gold mining sector (Osisko)

New Acquisitions

- AMK has acquired several new prospective properties on very favorable terms, taking advantage of market softness to bolster our portfolio of quality gold and silver projects

Extensive Programs in 2020

- JV – Extensive program on Treaty Creek to obtain a resource calculation
- 100% owned – Exploration programs on Gold Hill, Dunwell, smaller programs on earlier stage properties.
