Forward-Looking Statements

This document contains forward-looking statements and factual information that are current as of the date the document was originally created. American Creek Resources Ltd. (“the Company”) disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Forward-looking statements include, but are not limited to, statements with respect to the timing and amount of estimated future exploration, success of exploration activities, expenditures, permitting, and requirements for additional capital and access to data.

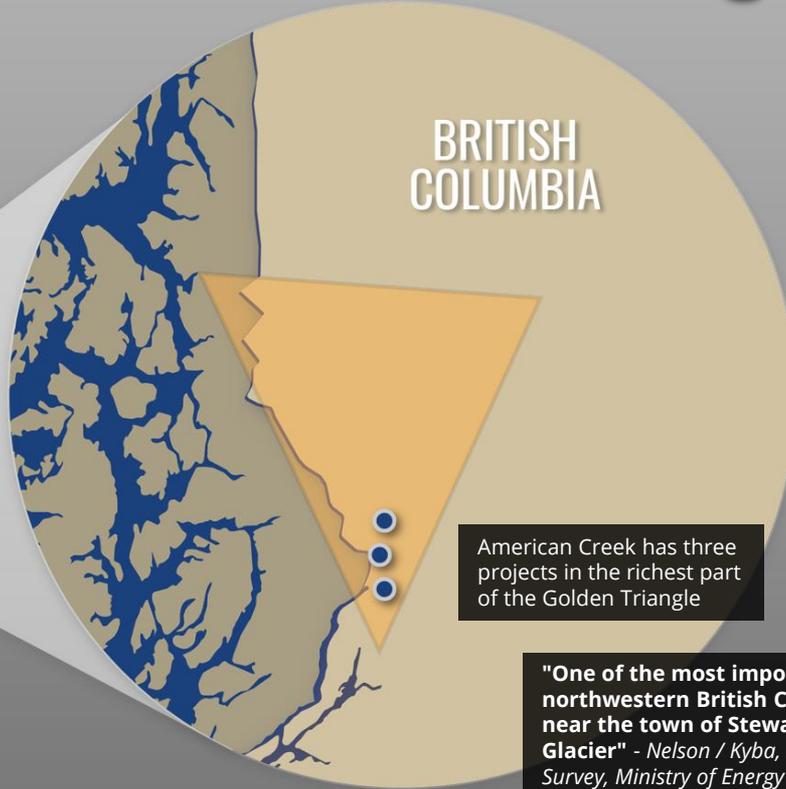

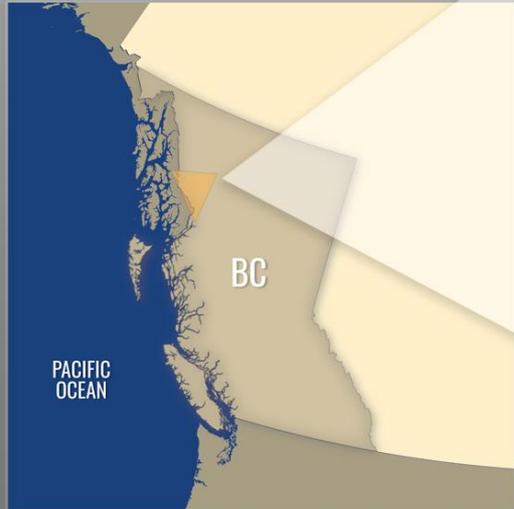

Forward looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; the ability to enter into joint ventures or to acquire or dispose of properties; future prices of mineral resources; accidents, labor disputes and other risks of the mining industry; ability to obtain financing; and delays in obtaining governmental approvals of financing.

Any statements, opinions, projections, forecasts or other material contained in this presentation do not constitute a commitment, representation or warranty by the company or its directors, officers, agents or employees. The directors, officers, agents and employees of the company shall in no way be liable to any person or body for any loss, claim, demand, damages, costs or expenses of whatsoever nature arising in any way out of, or in connection with, the information contained in this presentation. This presentation does not constitute an offer to sell securities and is not a solicitation of an offer to buy securities. It is not to be distributed to third parties without the consent of the company. An investment in the company is considered to be speculative in nature. Each individual should rely solely upon its own investigations and inquiries with respect to the company and agrees it will not in any way rely upon this presentation. The company recommends that you consult your own professional advisor(s).

British Columbia's Golden Triangle

The Golden Triangle hosts one of the richest gold / silver / copper belts in the world including the world's largest undeveloped gold deposit (by reserves)

American Creek has three projects in the richest part of the Golden Triangle

"One of the most important mineral trends of northwestern British Columbia extends from near the town of Stewart north to the Treaty Glacier" - Nelson / Kyba, *British Columbia Geological Survey, Ministry of Energy and Mines 2014*

Mine proliferation

Numerous past producing mines, two mines have just gone into production, many world scale projects moving towards production

New infrastructure

Paved roads, power, ice-free bulk-tonnage port

New geological understanding

of the area positive for new discoveries and directly relates to Treaty Creek – Kyba / Nelson 2014

Geological expertise

The regional geologist for NW B.C., Jeff Kyba, has left his position at the ministry and is now helping develop the Treaty Creek and Electrum projects

Our Joint Venture Partner

American Creek Resources has formed joint venture partnerships with Tudor Gold Corp on the Treaty Creek and Electrum projects in the Golden Triangle.

The President and CEO of Tudor is Walter Storm with more than 50 years of global business experience. He financed the startup of what became Osisko Mining and helped the company to develop a world class gold mine reaching market capitalization of \$4.50 Billion. Mr. Storm feels that these flagship properties have more potential than his previous successes in mining had.

Tudors geological team includes the former Regional Geologist for the NW (Skeena) Division of B.C.'s Ministry of Energy and Mines, Jeff Kyba (January 2017).

AMK has a fully carried interest of 20% on Treaty Creek and a standard JV of 40% on Electrum.

Tudor Gold Corp.

TSX-V: AMK OTC: ACKRF

Treaty Creek

gold 79 Au 196.97	silver 47 Ag 107.87	copper 29 Cu 63.546
-----------------------------------	-------------------------------------	-------------------------------------

Treaty Creek is adjacent to, and part of the same hydrothermal system as, the world's largest undeveloped gold deposit by reserves (KSM - Seabridge Gold) and one of the highest-grade precious metal mines in the world (Brucejack – Pretivm); collectively representing one of the greatest concentrations of metal value on the planet.

Treaty Creek has similar geophysical, geological, and structural signatures as the KSM with indications of similar scale (potentially 7km of mineralization at depth), backed by a government geological report stating it's potential to be "B.C.'s next big discovery". - Kyba 2014. A maiden resource calculation is expected late 2018.

TSX-V: **AMK** OTC: **ACKRF**

 **RED MOUNTAIN**

DUNWELL

 Porter Idaho

 **STEWART, B.C.**

 **PREMIER**

Dunwell Mine Group

(Bear River / Dunwell / Silvershot)

gold 79 Au 196.97	silver 47 Ag 107.87
lead 82 Pb 207.2	zinc 30 Zn 65.39

Historical Production at the Dunwell mine totaled 45,657 tonnes averaging 6.6 g/t gold, 223.9 g/t silver, 1.8% lead, and 4% zinc, or 14.3 g/t gold equivalent.

Potential exists to develop more reserves along strike to the present workings and at depth below the No. 4 level. Drilling in 2010 indicated similar grades in a zone at least 300 metres long and 200 metres along dip with a true thickness of 6-7 metres, suggesting an extension of the mineralization previously discovered.

Multiple high grade exposures running for over 3km along strike with mine. Low altitude mine with a highway and power, and only 8km from Stewart / port.

TSX-V: **AMK** OTC: **ACKRF**

Gold Hill

gold 79 Au 196.97	silver 47 Ag 107.87	lead 82 Pb 207.2
-----------------------------------	-------------------------------------	----------------------------------

The Gold Hill is believed to be the principle source for the gold found in the Wild Horse River Gold Rush of 1864 which turned out to be the fourth largest placer deposit in Canada.

Historic small scale production of hard rock source gold with more recent adit samples as high as 75 g/t gold, 67.5 g/t silver and 6.1% lead over 6.7 metres. Selective High grade grab samples up to 442 g/t gold with 1660 g/t silver.

Minimal exploration to date with exceptional logistics in place: road with power and town nearby

www.americancreek.com

TSX-V: **AMK** OTC: **ACKRF**

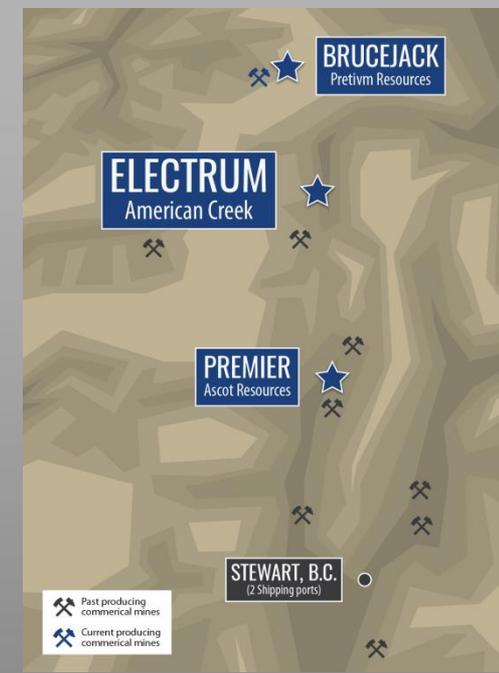

Electrum

gold 79 Au 196.97	silver 47 Ag 107.87	lead 82 Pb 207.2	zinc 30 Zn 65.39
-----------------------------------	-------------------------------------	----------------------------------	----------------------------------

The Electrum (formerly East Gold Mine) is located directly between the Silbak Premiere mine (25km S) and the Brucejack mine (20km N) with numerous geological similarities between them as documented in their respective geological summary reports.

Historic hand mined electrum ore with **average** grades of 1,661 g/t gold with 2,596 g/t silver, current drill results up to 440 g/t Au with 400 g/t Ag, surface samples up to 1,926 g/t Au with 37,955 g/t Ag, and high grade bulk samples.

Minimal exploration to date with exceptional logistics in place: road, power, town, shipping port.

gold 79 Au 196.97	silver 47 Ag 107.87	copper 29 Cu 63.546
-----------------------------------	-------------------------------------	-------------------------------------

AMPLE GOLDMAX

The Ample Goldmax property has an established trend of mineralized zones along the Cayoosh Creek Fault for more than 3 kms. The gold produced at its historical Golden Cache Mine (averaging 9g/t @50% recovery) is a likely source for the placer deposits. Many of the mineralized zones like the Ample–Goldmax and Bonanza Ridge zones display visible free gold and abundant sulphide lenses, along a strike length of showings over 1km in length. 8km by road to Lillooet.

AUSTRUCK BONANZA

Within 100m of a 3,700 tonne bulk sample grading 26.5 g/t gold & multiple high grade gold veins. Potential exists for large porphyry bulk tonnage copper-gold mineralization as well. Forestry Roads on property.

gold 79 Au 196.97	copper 29 Cu 63.546	silver 47 Ag 107.87
-----------------------------------	-------------------------------------	-------------------------------------

silver 47 Ag 107.87	zinc 30 Zn 65.39	lead 82 Pb 207.2	gold 79 Au 196.97
-------------------------------------	----------------------------------	----------------------------------	-----------------------------------

SILVERSIDE

Very high grade showings traced over 100 metres and in several distinct horizons with Silver from 75 - 558 ppm (or up to 17 oz/t), Zinc from 12 - 40%, and Lead from 9.75 - 12%.

At least 4 high grade Zn-Ag-Pb showings associated with deformed and metamorphosed carbonates have been discovered on the property with a prospective carbonate horizon extending for at least 2.5 kilometres.

GLITTER KING

Large scale VMS system with three separate mineralized zones 3.5 kilometres apart along strike and along a major fault. An 80 m segment of the sulphide zone which was sampled in detail by BP Resources Canada Ltd. averaged 2.5% copper, 2.80% zinc, 0.56% lead, 1.47 oz/ton silver and 0.015 oz/ton gold over an average width of 1.15 metres.

copper 29 Cu 63.546	zinc 30 Zn 65.39	gold 79 Au 196.97	silver 47 Ag 107.87
-------------------------------------	----------------------------------	-----------------------------------	-------------------------------------

NEAR TERM OBJECTIVES HOLD GREAT PROMISE OF DISCOVERY

Treaty Creek – AMK has a carried interest

- Multi-million-dollar diamond drilling program in 2018
- Define a resource calculation on Copper Belle zone – point of discovery creates biggest returns
- Test highly prospective areas indicated by geophysical anomalies
- Drill into the indicated mineralization extending for 4km south to the Seabridge KSM border

Gold Hill

- Mapping and sampling existing adits and newly discovered gold veins
- Identify drill targets
- Drilling to test extension of mineralization in syenite dykes

Dunwell Mine Group

- Locate and sample the eight previous areas of high-grade production (on surface and adits)
- Mapping, sampling, and analyzing structure of mine
- Identify drill targets / confirmation and step out drilling of zone discovered in 2010

Programs on Austruck Bonanza, Ample Goldmax, Silverside, and Glitter King

- Mapping, sampling, magnetic & IP geophysics, and geochemistry.

Darren R. Blaney

President, Chief Executive Officer, Director

Mr. Blaney co-founded American Creek Resources Ltd. in 2004 and is the President, Chief Executive Officer and a Director of the Corporation. Mr. Blaney served as the Corporation's Chief Operating Officer for 10 years prior to being appointed to his current position. He has 20 years of varied business and investment experience which includes mineral exploration investment, real estate investment, marketing and sales, environmental consulting to both government and non-government organizations, business consulting, and executive corporate management.

Robert N. Edwards, CPA, CGA

Chief Financial Officer, Director

Mr. Edwards has been the Chief Financial Officer and a Director of the Corporation for 10 years. He has been employed in the public accounting field for the last 15 years, holding positions in international and local firms in the areas of business consulting, assurance, and tax. He has also owned businesses operating in land development, health care and logistics, and retail sales and is currently a partner in a private accounting firm. Mr. Edwards obtained a Bachelor of Management degree from the University of Lethbridge and is a member of the Chartered Professional Accountants of Alberta.

Sean Pownall
Director

Mr. Pownall serves as a Director of the Corporation. He has been involved in the mineral exploration industry for nearly 30 years, starting at an early age working with family on mining projects in the Yukon and in British Columbia. Mr. Pownall has worked as a diamond driller on numerous mineral projects in Canada and the United States ranging from grassroots exploration to full production mining. He is currently the owner of More Core Diamond Drilling Ltd., a company based in Stewart, British Columbia. The company was founded in 2006, and provides diamond core drilling and geotechnical drilling services to mineral and liquid natural gas companies throughout Canada and the United States. Mr. Pownall currently also serves as a Director of the Association for Mineral Exploration British Columbia (AME BC).

Dennis Edwards, CPA, CA
Director

Mr. Edwards serves as a Director of the Corporation. Mr. Edwards attended Lethbridge Community College and the University of Lethbridge where he earned his BA in Agricultural Economics. He attended the Chartered Accountant School of Business where he earned his Chartered Accountant designation and has been employed in the accounting field for over 10 years. He is currently a partner in a private accounting firm. Mr. Edwards is a member of the Chartered Professional Accountants of Alberta.

Summary

Strong Management

- Management, directors, and advisors with extensive exploration experience

Exceptional Properties

- In the richest part of B.C.'s Golden Triangle and other historic mining camps
- Next to world class deposits & mines with same geology
- In a politically stable region
- Excellent logistics combined with tremendous potential
- Discovery stage – resource calculations in the near future

Joint Ventures with strong partner with mining success

- Walter Storm has the “Midas Touch” in business including the gold mining sector (Osisko)

New Acquisitions

- AMK has acquired several new prospective properties on very favorable terms, taking advantage of market softness to bolster our portfolio of quality gold and silver projects

Extensive Programs in 2017 with resource calculation(s) potential

- JV – Extensive program on Treaty Creek to obtain a resource calculation
- 100% owned – programs on Gold Hill, Dunwell, smaller programs on earlier stage properties.
