Forward-Looking Statements

This document contains forward-looking statements and factual information that are current as of the date the document was originally created. American Creek Resources Ltd. (“the Company”) disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Forward-looking statements include, but are not limited to, statements with respect to the timing and amount of estimated future exploration, success of exploration activities, expenditures, permitting, and requirements for additional capital and access to data.

Forward looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward looking statements. Such factors include, among others, risks related to actual results of current exploration activities; changes in project parameters as plans continue to be refined; the ability to enter into joint ventures or to acquire or dispose of properties; future prices of mineral resources; accidents, labor disputes and other risks of the mining industry; ability to obtain financing; and delays in obtaining governmental approvals of financing.

Any statements, opinions, projections, forecasts or other material contained in this presentation do not constitute a commitment, representation or warranty by the company or its directors, officers, agents or employees. The directors, officers, agents and employees of the company shall in no way be liable to any person or body for any loss, claim, demand, damages, costs or expenses of whatsoever nature arising in any way out of, or in connection with, the information contained in this presentation. This presentation does not constitute an offer to sell securities and is not a solicitation of an offer to buy securities. It is not to be distributed to third parties without the consent of the company. An investment in the company is considered to be speculative in nature. Each individual should rely solely upon its own investigations and inquiries with respect to the company and agrees it will not in any way rely upon this presentation. The company recommends that you consult your own professional advisor(s).

The Qualified Person for this presentation is James A. McCrea, P. Geo., who has read and approved the scientific and technical information.

TREATY CREEK

Au, Ag, Cu

STEWART

AUSTRUCK-BONANZA

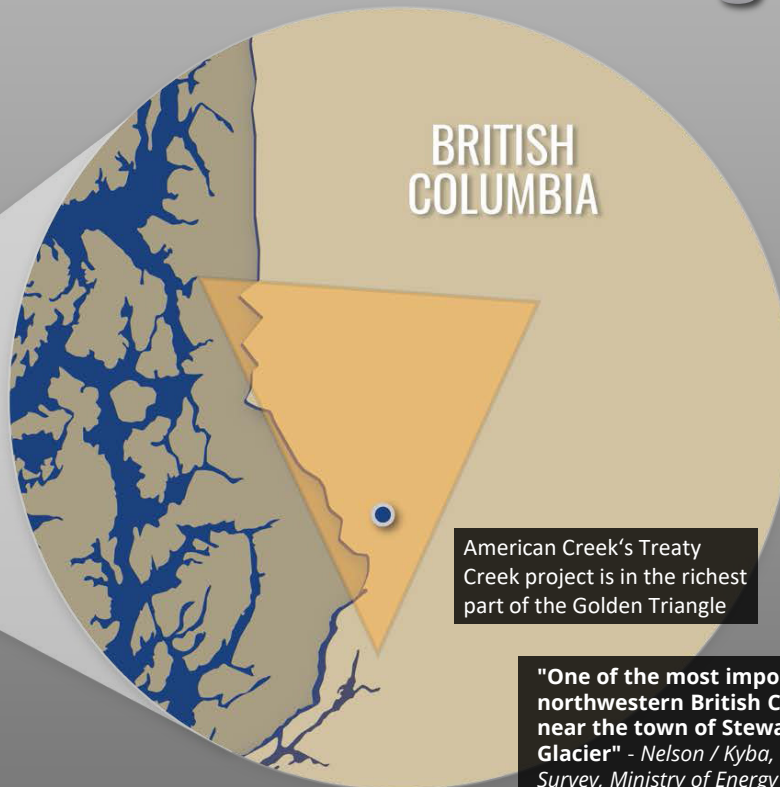

Au, Ag, Cu

KAMLOOPS

VANCOUVER

British Columbia's Golden Triangle

The Golden Triangle hosts one of the richest gold / silver / copper belts in the world including the world's largest undeveloped gold deposit (by reserves)

American Creek's Treaty Creek project is in the richest part of the Golden Triangle

"One of the most important mineral trends of northwestern British Columbia extends from near the town of Stewart north to the Treaty Glacier" - Nelson / Kyba, *British Columbia Geological Survey, Ministry of Energy and Mines* 2014

Mine proliferation

Numerous past producing mines, two current mines, and new mines scheduled for 2024 & 2026; many world-scale project moving towards production

New infrastructure

Paved roads, power, ice-free bulk-tonnage port

New geological understanding

of the area positive for new discoveries and directly relates to Treaty Creek – Kyba / Nelson 2014

Geological expertise

Ken Konkin, involved in the development of Newmont's Brucejack mine next door (2017), is now developing our JV Treaty Creek property

Our Joint Venture Partner

The late founder of Tudor Gold, Walter Storm, had more than 50 years of global business experience. He financed the startup of what became Osisko Mining and helped the company to develop a world class gold mine reaching market capitalization of \$4.50 Billion CAD. Mr. Storm felt that the Treaty Creek property has even greater potential than his venture with Osisko.

Tudors President and CEO, Ken Konkin, was involved in the discovery and development of Newmont's Brucejack mine next door (located in the same hydrothermal system) which sold for \$3.5 billion CAD in early 2022.

AMK has a fully carried interest of 20% on Treaty Creek meaning Tudor pays all exploration costs until a production notice is given.

Treaty Creek

gold 79 Au 196.97	silver 47 Ag 107.87	copper 29 Cu 63.546
-----------------------------------	-------------------------------------	-------------------------------------

Treaty Creek is adjacent to, and part of the same hydrothermal system as, the world's largest undeveloped gold deposit by reserves (KSM - Seabridge Gold) and one of the highest-grade precious metal mines in the world (Brucejack – Newmont); collectively representing one of the greatest concentrations of metal value on the planet. Treaty Creek has similar geophysical, geological, and structural signatures as the KSM with indication of similar scale with far better logistics. Mineralization starts close to surface and extends beyond 1,500m at depth.

The resource calculation on the Goldstorm zone contains **23.37 million ounces of 1.13 GPT AuEq of Indicated mineral resources and 7.35 million ounces of 0.98 GPT AuEq of inferred mineral resources** and is open in all directions. Tudor Gold has a discovery cost of only \$2.00 CAD / ounce vs the industry average of \$40 USD /ounce. Because of the fully carried nature of American Creek's 20% interest our shareholders enjoy a \$0 / ounce discovery rate.

Metal prices used were US\$1,625/oz Au, US\$19/oz Ag, US\$2.80/lb Cu with process recoveries of 88% Au, 30% Ag and 80% Cu. A C\$16.50/tonne process and C\$2 G&A cost were used

Treaty Creek

String of pearls – just really big pearls!

Ken Konkin (President Tudor Gold), who was a critical factor in the development of the Brucejack Mine (Newmont) just a few kilometers south of Treaty Creek, is an expert in both large scale systems and geology in the Golden Triangle. He has often spoken of the importance of the “frequency for occurrence”, “frequency for distribution”, and “structural traps” of world class hydrothermal systems that create a predictable “rhythm”.

He’s stated that the Sulphurets Hydrothermal System, which includes Brucejack, KSM, and Treaty Creek, is a perfect example and refers to its many deposits as a **“string of pearls.....just really big pearls!”** The potentially massive deposits on Treaty, including the Goldstorm and the Perfect Storm Zone, are located exactly where they should be.

Treaty Creek – checking all the boxes

gold 79 Au 196 97	silver 47 Ag 107 87	copper 29 Cu 63 546
-----------------------------------	-------------------------------------	-------------------------------------

- Goldstorm: >30M Oz @ +1 g/t AuEq (I + Inf)

Metal prices used were US\$1,625/oz Au, US\$19/oz Ag, US\$2.80/lb Cu with process recoveries of 88% Au, 30% Ag and 80% Cu. A C\$16.50/tonne process and C\$2 G&A cost were used

- 24.5 M Oz Gold / 157 M Oz Silver / 3 Bn Lbs Copper
- > 15M Oz @ 1.48 g/t AuEq Indicated using a 1 g/t AuEq cut-off
- Drill results are indicating potential for significant expansion – open in all directions
- High-grade zones (59+ g/t gold) being discovered

- One of possibly four district-scale deposits on Treaty Creek
- Road and power from highway to within a few kilometers by end of 2023
- Discovery rate of only \$2.00 CAD/ ounce
- 150Km down highway to west coast bulk tonnage shipping ports (year around)
- Ample water resource
- Potential for multi-generational production
- Politically safe / mining friendly jurisdiction with local and 1st Nations support

Austruck-Bonanza

gold 79	silver 47	copper 29
Au	Ag	Cu
196.97	107.87	63.546

The Austruck-Bonanza lies within the southern extension of the Quesnel Trough (a heavily mineralized major trend through central B.C) and is contiguous with the Bonaparte Gold property to the south east.

Work on the neighbouring Bonaparte property has outlined the presence of a series of well-developed shear zones that contain numerous auriferous quartz veins. Two small open pits on the Bonaparte property yielded a **3,700 tonne bulk sample grading approximately 26.5 grams gold per tonne and 364 tonnes grading 6.28 grams gold per tonne**. The first pit is within a stones throw of the Austruck-Bonanza border.

The property boasts excellent logistics including road and power in a mining friendly jurisdiction.

NEAR TERM OBJECTIVES HOLD GREAT PROMISE OF DISCOVERY

Treaty Creek – AMK has a carried interest

- 2023 Exploration started in May – 30,000 meters to:
 - Infill (move Inferred to Indicated) and test the northern extent of the Goldstorm deposit
 - Exploration on the Perfectstorm zone
- Ongoing environmental studies
- Ongoing metallurgical work
- Potential update of National Instrument 43-101 resource calculation in 2024
- Preliminary work towards Preliminary Economic Assessment

Austruck Bonanza

- Program to be announced closer to the date of execution

Darren R. Blaney

President, Chief Executive Officer, Director

Mr. Blaney co-founded American Creek Resources Ltd. in 2004 and is the President, Chief Executive Officer and a Director of the Corporation. Mr. Blaney served as the Corporation's Chief Operating Officer for 10 years prior to being appointed to his current position. He has 26 years of varied business and investment experience which includes mineral exploration investment, real estate investment, marketing and sales, environmental consulting to both government and non-government organizations, business consulting, and executive corporate management

Robert N. Edwards, CPA, CGA

Chief Financial Officer, Director

Mr. Edwards has been the Chief Financial Officer and a Director of the Corporation for 16 years. He has been employed in the public accounting field for the last 19 years, holding positions in international and local firms in the areas of business consulting, assurance, and tax. He has also owned businesses operating in land development, health care and logistics, and retail sales and is currently a partner in a private accounting firm. Mr. Edwards obtained a Bachelor of Management degree from the University of Lethbridge and is a member of the Chartered Professional Accountants of Alberta.

Tobin Wood
Director

Mr. Wood has a Bachelor of Management degree from Athabasca University and a Business Administration diploma from the Lethbridge Community College. He is successful entrepreneur, mineral exploration investor, business owner and realtor specializing in residential, commercial and agricultural markets.

Dennis Edwards, CPA, CA
Director

Mr. Edwards serves as a Director of the Corporation. Mr. Edwards attended Lethbridge Community College and the University of Lethbridge where he earned his BA in Agricultural Economics. He attended the Chartered Accountant School of Business where he earned his Chartered Accountant designation and has been employed in the accounting field for over 16 years. He is currently a partner in a private accounting firm. Mr. Edwards is a member of the Chartered Professional Accountants of Alberta.

Summary

Strong Management

- Management, directors, and advisors with extensive exploration experience

Exceptional Properties

- In the richest part of B.C.'s Golden Triangle and other historic mining camps
- Next to world class deposits & mines with same geology
- In a politically stable, mining friendly region with 1st Nations Support
- Excellent logistics combined with tremendous potential
- Discovery stage - Discovery rate of only \$2.00 CAD/ ounce

Joint Ventures with strong partner with mining success

- Ken Konkin has reassembled the team that was instrumental in the development of the Brucejack mine (through Pretium) that was purchased by Newcrest Mining for \$3.5 billion CAD in early 2022.

Extensive Programs in 2023

- AMK-JV – Expand resource calculation at Goldstorm / develop Perfectstorm
- AMK – potential geophysical and geological exploration to take place this summer / fall
